Pursuing a career is an essential part of adolescent development. “The adolescent becomes an adult when he \_\_\_1\_\_\_ a real job.” To cognitive researchers like Piaget, adulthood meant the beginning of an \_\_\_2\_\_\_.

Piaget argued that once adolescents enter the world of work, their newly acquired ability to form hypotheses allows them to create representations that are too ideal. The \_\_\_3\_\_\_ of such ideals, without the tempering of the reality of a job or profession, rapidly leads adolescents to become \_\_\_4\_\_\_ of the non-idealistic world and to press for reform in a characteristically adolescent way. Piaget said: “True adaptation to society comes \_\_\_5\_\_\_ when the adolescent reformer attempts to put his ideas to work.”

Of course, youthful idealism is often courageous, and no one likes to give up dreams. Perhaps, taken \_\_\_6\_\_\_ out of context, Piaget’s statement seems harsh. What he was \_\_\_7\_\_\_, however, is the way reality can modify idealistic views. Some people refer to such modification as maturity. Piaget argued that attaining and accepting a vocation is one of the best ways to modify idealized views and to mature.

As careers and vocations become less available during times of \_\_\_8\_\_\_, adolescents may be especially hard hit. Such difficult economic times may leave many adolescents \_\_\_9\_\_\_ about their roles in society. For this reason, community interventions and government job programs that offer summer and vacation work are not only economically \_\_\_10\_\_\_ but also help to stimulate the adolescent’s sense of worth.
