

高三英语第九期·语法填空自测

限时：6 分钟

II. Grammar and Vocabulary

Section A

Directions: After reading the passages below, fill in the blanks to make the passages coherent and grammatically correct. For the blanks with a given word, fill in each blank with the proper form of the given word; for the other blanks, use one word that best fits each blank.

Once just a science fiction idea, VR has now become more accessible than ever. __1__ (wear) a pair of VR goggles connected to your computer and you can experience a lot of things without stepping out of the room. From climbing __2__ (high) mountain in the world to flying a spacecraft, the things you can experience with VR are limitless.

This new 'reality' is starting to takeover China. The Report on Chinese VR Users' Behavior was released on March 18 during the 12th TFC Global Mobile Game Conference & Intelligent Entertainment Expo held in Beijing. The report is based on a survey of 5,626 people, __3__ (age) between 15 and 39, from across the country. It shows that up to 68.5 percent of people have heard of __4__ are interested in VR products.

But surprisingly, it isn't new technology that has made VR so popular. 'VR has been __5__ for many years, but it will stick this time because there's enough computer power and the price will just keep going down,' Todd Richmond, a VR group member with the Institute of Electrical and Electronic Engineers in the US, told USA Today.

VR __6__ (expect) to change various different fields. For example, VR could be used to train pilots and miners before they had to actually risk their lives in highly dangerous working environments, or to treat patients with acrophobia(恐高症) by making them think they were standing on top of a high building.

'If you have perfect virtual reality, __7__ you'll be able to simulate everything that a human can experience or imagine experiencing, it's hard to imagine where you go from there,' Palmer Luckey, 23 inventor of the Oculus VR goggles, told NPR.

But the technology is still far from perfect. Users report experiencing motion sickness, headaches and other discomfort while wearing VR goggles. Also, __8__ more and more tools are flooding the market, the software that runs VR games and simulators has yet to catch up with all the new advancements. It could take __9__ while for VR to be widely accepted.

When every new technology is first introduced, the technology __10__ is the driving force. But for it to really blend into people's lives, meeting basic and practical needs should be the main aim.
